Minutes of the Minister for Public Works

NAI 159-60

Dated, Bangalore,... 31st March., *1959*

1) It is clear from the 1924 Agreement that Mysore can develop the achkat to an extent of one-third of the existing achkat under various canals that existed before 1910. No serious attempts appear to have been made to avail of this opportunity and increase the achkat to one-third of the existing extent by improving duty. The Chief Engineer may be directed to get all necessary details under the several canals that are now functioning and which existed before 1910 with definite proposals for improving duty and extending the achkat to the permissible extent.

If the State fails to construct irrigation projects in the Cauvery Basin to irrigate the permissible extent viz., 1,10,000 acres, by 1974 the State will stand to lose by default. Immediate action has to be taken to investigate into all feasible projects in the Cauvery basin and put them through. In this connection, the Kambadakada Project across Cauvery in the border of Mysore and Coorg Districts and the Harangi Project across Harangi river in Coorg District may be investigated expeditiously. Action may also be taken to finalise the Hemavathi Project across Hemavati river near Gorur in Hassan District. The other feasible projects may also be investigated quickly. Unless the Chief Engineer takes active interest in this connection, ~~the State will~~ stand to lose. Necessary instructions may therefore be issued to the Chief Engineer to take up these questions in earnestness. Periodical reports of action taken on the above may be called for and put up.

(H.M.Channabasappa)
Minister for PW&E.

MYSORE GOVERNMENT SECRETARIAT No 2476 30 APR 1962 P. W. D. (BUILDING SECTION)

Note. Contd. Sheet

Serial No. 87

Clause 10(xi) of 1924 Agreement states "... the limitations & arrangements embodied in Clauses (ii) to (viii) supra shall, at the expiry of fifty years from the date of the execution of these presents, be open to reconsideration in the light of the experience gained & of an examination of the possibilities of the further extension of irrigation within the territories of the respective Govts & to such modifications & additions as may be mutually agreed upon as the result of such reconsiderations."

It is clear from above, that it is 'reconsideration' i.e. revision of any provisions falls due after 1974 & any 'modification' as a result of such 'reconsideration' can be entertained only if 'mutually agreed upon'. Therefore, it does not at all transpire that provisions in the agreement lapse as a matter of course after 1974, if not implemented before that time, as stated in my predecessor's letter @ P-3 C/R or in Min (Channabasappa's) Minute @ P-1. This erroneous notion is there in general public also & it is necessary to eradicate it -- which is unnecessarily fatalistic in its conception.

Serial No.

19) Regarding taking concerted measures to ~~improve~~ increase the irrigation on the old channels, it is not known how far the existing arrangements of maintenance of the system is adequate. On the one hand the channels are distributed under ~~two~~ more than one Circle* & numerous Divisions*. At C.E.'s level there is a sort of dual control. The channels are with C.E. (G) & KRS is with C.E. (P) & the latter is also to deal with Madras Govt. so far as 1924 Agreement is concerned. All this is not conducive to any concerted action to deal with the irrigation system as a whole. Some thing has to be done ~~on this~~ regarding this aspect in consultation with the two C.E.'s. The example of the Pre Mogal Channels on T.B. ~~is~~ is a standing example where some thing had to be done for similar reasons.

D.S. (I.)

S. G. BALEKUNDRY

Note.—Contn. Sheet 293

* I have been told even the charges of these Divs & Circles have undergone numerous changes during past years, records are misplaced.

6 1924 Agreement - details of canals investigation of Projects —

File No. PWD 7 NIC of 1957

Mysore Government Secretariat

Serial No.

20) Paragraphs 12 to 19 above are for perusal w.r.t. to para 16 ante. For orders as to what further course of action is to be taken in the matter.

19/5/57 for

19/5/57

21) Secretary, PWD may please see para.17 to 19 with reference to para.1 of the notes.

22) It is quite necessary and essential that all matters relating to K.R.S. Dam, all channels above and below K.R.S. Dam, and the V.C. Channel from K.R.S. Dam should be dealt by one Chief Engineer instead of two. At present, 25 channels as enumerated at 'A' at page 19 C.F. are under the control of Chief Engineer (General). The Chief Engineer, Irrigation Projects is in charge of K.R.S. Dam and its allied works including the V.C. Canal. He also deals with matters pertaining to 1924 Agreement.

23) As the Secretary, PWD is aware, we have recently transferred pre-Mogul channels under the Tungabhadra Project from the control of the Chief Engineer (General) to the control of the Chief Engineer, Irrigation Projects. But in this case, as the K.R.S. Dam and the canal works are all completed the present works pertaining to them are more of a maintenance type than of a construction type, works now under the control of C.E., I.P. may be given to the control of the C.E.(G), so that he can have the overall control

WD 2350—GP3—PZS—2.10.57—1258

Mysore Government: Secretariat

File No. PWD 7 IRJ 59 of 1959. [App. F. III 2

Serial No.1

of all works in this region. He will have to deal with also matters pertaining to 1924 Agreement.

24) The present distribution of works among the two C.Es. is based on the fact that all Plan Schemes costing more than Rs.10 lakhs are to be dealt with by C.E., I.P. and all works costing less than Rs.10 lakhs are to be dealt with by C.E.(G). Some of the works on the channels under the control of the C.E.(G), such as repairs to Hangod series, though costing more than Rs.10/- lakhs are now under the control of C.E.(G), as they are non-Plan Schemes.

25) It may not be desirable to transfer all the 25 old channels now under the control of C.E.(G) to the control of C.E., I.P., as the work-load for the C.E., I.P. will un-necessarily increase with all minor matters and may not be in a position to devote full attention for the various major and medium irrigation projects under his control.

Copy of letter No. KRS/IRN/TEC/17/TA2/60-61 dated 16-3-1961 from the Chief Engineer, Irrigation Projects, Munirabad addressed to the Secretary to Government, Public Works Department, 'Vidhana Soudha', Bangalore and copied to the Superintending Engineer, Mysore Circle, Mysore.

Sir,

Sub:- 1924 Agreement - Area under irrigation, under old channels

Ref:- This office letter of even No. dated 30-1-61.

While inviting your reference to the correspondence resting with this office letter cited above, I am to state that the subject is not yet finalised for want of complete details from the serveral Executive Engineers in charge of the river channels above and below Krishnarajasagar.

As already mentioned in this office letter of even No. dated 11-11-60 and 30-12-60, all these river channels above and below Krishnarajasagar reservoir come under the charge of the Chief Engineer, General and the Executive Engineers of all these Divisions except the Executive Engineer, K.R.S. Division, K.R. Sagar, are under the administrative control of him.

As such I request you kindly to address the Chief Engineer, General, to deal with this subject as already requested in this office above letter.

Yours faithfully,

Sd/ -
for Chief Engineer
Irrigation Projects.

...

Sub:-1924 agreement- area under irrigation under old channels.

...

Ref:-Your L.No.KRS/JRN/TEC/17/T42/dt.30th Decr. 1960.

...

Adverting to the above, I write to state that as already reported in this office No.648/4GT/IRG/12432, dt.24-11-60, Ramanathapur channel and Sriramadevaru South Channels do not come under the jurisdiction of this circle. Regarding the channels noted in the margin, it can be seen from the maps sent in this office number cited above that these channels tail off in the water spread of K.R.Sagar Reservoir and there is no possibility of further extension of these channels.

1. Mirle Series.
2. Ramasamudram channel.
3. Hussainpur channel.
4. Siriyur channel.

Kattepur channel:- The total area developed under this channel is 4483 acres as against the total permissible extent of 5452 acres leaving a balance of 969 acres yet to be developed. It is reported that there is a small extension work under progress which benefits an addition extent of 223 acres. Thus there will be still a balance of 746 acres left out in this channel undeveloped.

Ramaswamy channel:- The total area developed under this channel as per irrigation statistics of 1958-59 (vide this office No.6/KRS/MMI/10442/ dt. 7-12-61) is 11,040 acres against the permissible extent of 11,095 acres. For practical purposes, it may be considered that full extent is developed under this channel.

Yedathithu and Mahadevapura channels:- These are in small islands in Srirangapatna and no extension is possible under these channels.

As regards Chamaraja left bank channel and Madagere right bank channel detailed report has already been sent in this office No.9668, dt.27-9-60 and No.364/KRS/MMI/8238, dt.7-10-61.

Regarding Mandagere Left Bank channel, I have to state that it was originally proposed to irrigate 3000 acres under this channel. Irrigations under Mandagere left bank channel was limited to 2,200 acres only vide G.O.No.4164-66 dt.10-12-1943 as against 3000 acres proposed in the project pending settlement with Madras Government regarding transference of atchkat from Mandagere right bank channel to Chamaraja Left bank channel. Area developed so far is 2523 acres (as per statistics of 1958-59) and the Madras Government has objected to the excess area developed under M.L.B.Channel (vide their No.3259/M/55-18, dt.7/57. Further extension of irrigation under this channel is not permissible unless directions cited in the Government order are revoked.

It is reported by the Executive Engineers that the lay out plan of the channels as existing in 1910 is not available in their offices.

In this connection, I request you kindly to recommend to the Government for the formation of a special squad sub-division for one year to go into the question of area developed under the river channels below and above K.R.Sagar covered in the agreement and to send up definite proposals for bringing additional area by extension of the channels since the work involves investigation and cannot be attended to by the regular divisions. Early action in the matter is requested.

sd/-
Superintending Engineer,
Mysore Circle, Mysore.

Memo 2162 D/S. to Govt
PWD

Copy of the letter No.KRS/KRN/TIC/17/TA2/60-61 dated 11-1-60, from the Chief Engineer, P.W.D. Irrigation Projects, Hunsurbad, to the Secretary to Government of Mysore, P.W.D., Bangalore.

Sub: 1924 Agreement Area under Irrigation under old Channels.

In inviting your kind reference to the correspondence resting with this office letter of even No. dated 18-8-1960, I am to state that the required particulars called for from the Superintending Engineer, Mysore Circle, Mysore and several Executive Engineers in charge of these old channels, are not yet received inspite of several reminders.

It may be stated in this connection thatall these marginally noted river channels which are above and below K.R. Sagar Reservoir come under the jurisdiction of the Chief Engineer, Irrigation & Public Health, Bangalore.

I. Channels above K.R. Sagar.

1. Ramanathpur Channel.
2. Kattepur Channel.
3. C.L.B. Channel.
4. Hirle Series.
5. Ramasamudram Channel.
6. Sriranadevaru (North)
7. Sriranadevaru (South)
8. Nandagere Right.
9. Hemagere.
10. Hamagod Series.
11. Kattemalavadi.
12. Hunsenpur.
13. Seriyur.

II. Channels below K.R. Sagar.

1. Devaroy
2. Chikadevroy Sagar.
3. Verijamado.
4. Dangaredoddi.
5. Ramasamy.
6. Rajapura Nesvari.
7. Madhavamanthri.
8. Yedathity.
9. Mahadevapur.

New Channels above K.R. Sagar.

1. C.R.B. Channel.
2. H.R.B. Channel.
3. H.L.B. Channel.

(A)

It may however be stated in this connection that the details required are how far the permissible extents under these channels as per 1924 Agreement with Madras can be secured, either by improvement to or extension of channels, to facilitate reduction in the compensation water that is being passed down to Madras. As the Chief Engineer, Irrigation and Public Health, Bangalore will be is intimate touch with the condition of these channels and the improvements they require, during his inspection and discussions with the concerned Executive Engineers, I suggest, that the Chief Engineer, I. & P.H. Bangalore may be requested to deal with the subject, and all the assistance required by this office will be rendered.
